Eco-club Report

The Department of Botany initiated Eco-club in the college in 2017 with the motive of student-centric activity towards making a green campus with green policy charter.

Initially degree final year students were enrolled in the club to look after the plants in the garden. From 2018 onwards Eco-club responsibility was taken by PG Botany students and staff. All the faculty members and some students from every year batches were made coordinators to monitor the garden regularly.

Students actively participated in the Eco-club activities from the beginning by contributing, adopting, maintaining the garden, and Haritha-Haram programs etc.

Students got good exposure with gardening, grafting and landscaping. New plants were added regularly to increase the database of the plants in the garden significantly.

A special medicinal plant garden has also been maintained with few additions regularly.

A small garden can effectively increase the O₂ levels in the air and reduce CO₂ emission, which provides a healthy and aesthetic ambience to the institution.
